INDEX

1. **Vision and Mission Statement of College, along with Quality Policy**

2. **Vision and Mission Statement of the Department**

3. **Program Educational Objectives (PEOs), Program Outcomes (POs) & Program Specific Outcomes (PSOs) Statements**

Vision and Mission of the College

Vision

To take ABES Engineering College to such a level that, it is at par with the leading institutions of the world in providing leadership to the international education system and be amongst the top-rated institutions of the world by providing a transformative education to create leaders and innovators embedded in traditional Indian values.

Mission

1. To create an ambiance for healthy teaching-learning process.
2. To nurture the students and infuse in them-
    - A passion to excel professionally.
    - A spirit to be of utmost use to the industry, corporate sector and the society at large.
    - An intense desire to take challenging responsibilities and leadership roles.
    - A craving to be wholesome good human beings.
3. To develop an environment for creating new knowledge through research and by thriving to explore innovative ideas.

Quality Policy

To continuously thrive to provide a congenial and wholesome academic environment and a healthy culture for faculty, staff and students which would motivate teachers' full participation with passion and develop an intense desire in the students to acquire comprehensive education and hence become a useful and confident human resource for the industry and academia.

Vision and Mission
of
Department of Electronics & Communication Engineering

Vision

To contribute to India and the world through excellence in education and research in the field of Electronics & Communication Engineering and serve as valuable resource for the industry and the society at large.

Mission

To create an environment, which shall encourage the development of innovative professionals and researchers in the cutting-edge technologies of Electronics & Communication Engineering, in line with industry requirements and to impart professional ethics with positive attitude.

Programme Educational Objectives (PEOs)

PEO 1. To impart the students sound technical knowledge and skills in the core & related science & mathematics subjects of Electronics & Communication Engineering so that they graduate as professionally competent engineers, capable of applying & implementing the acquired skills.

PEO 2. To inculcate in students a desire to be innovative and passionate about excelling in the field of Electronics & Communication Engineering.

PEO 3. To develop managerial and soft skills so that they become confident and competent enough to take challenging responsibilities & leadership roles in the industry & corporate.

PEO 4. To equip them with solid foundation in ECE engineering so that they can pursue higher studies in the subject.

PEO 5. To groom the students to acquire professional ethics, moral values and devotion to duty so that they prove to be worthy citizen of India with international outlook.

Program Outcomes (POs)

PO1. **Engineering knowledge**: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9. **Individual and teamwork:** Function effectively as an individual, and as a member or leader in diverse exams, and in multidisciplinary settings.

PO10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12. **Life-long learning:** Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs) relevant to the Course:

PSO1. An ability to design and analyze the concepts and applications in the field of communication/ networking, signal processing, embedded systems, and semiconductor technology.

PSO2. An ability to comprehend the technological advancements in the usage of modern design tools to analyze and design subsystems/processes for a variety of applications.

PSO3. An ability to learn the courses related to Microelectronics; Signal processing, Microcomputers, Embedded and Communication Systems to develop solutions to real world problems.

PSO4. An ability to communicate in both oral and written forms, the work already done and the future with necessary road maps, demonstrating the practice of professional ethics and the concerns for social and environmental impact.

4. Evaluation Scheme as received from University

SESSION: 2022-23	**YEAR / SEM:** I/ I

Course Outcome No.	**Statements**	**Knowledge Level, KL**
CO1	Get an understanding of the theoretical principles of chemistry of molecular structure, bonding and properties, Chemistry of advanced materials (liquid crystals, Nanomaterials, Graphite & Fullerene) as well as the Principles of Green Chemistry.	K2 (Understand)
CO2	Apply the fundamental concepts of determination of structure with various spectral techniques and stereochemistry.	K3 (Apply)
CO3	Utilize the theory of construction of electrodes, batteries and fuel cells in redesigning new engineering products and categorize the reasons for corrosion and study methods to control corrosion and develop understanding of Chemistry of Engineering materials (Cement).	K3 (Apply)
CO4	Develop understanding of the sources, impurities and hardness of water, apply the concepts of determination of calorific values and analyze the coal.	K2 (Understand)
CO5	Develop the understanding of Chemical structure of polymers and its effect on their various properties when used as engineering materials. Understanding the applications of specific polymers and Chemistry applicable in industrial process.	K2 (Understand)

SESSION: 2022-23	**YEAR / SEM:** II / III

Course Outcome No.	Statements	Knowledge Level, KL
CO1	Understand the principles of semiconductor devices.	K2 (Understand)
CO2	Elaborate and utilize the mathematical models of semiconductor junctions.	K3 (Apply)
CO3	Articulate carrier transport in semiconductors and design resistors.	K2 (Understand)
CO4	Utilize the mathematical models of MOS transistors for circuits and systems.	K3 (Apply)
CO5	Analyse and find application of special purpose diodes.	K2 (Understand)

SESSION: 2022-23	**YEAR / SEM:** III/ V

Course Outcome No.	Statements	Knowledge Level, KL
CO1	Design and describe different types of realizations of digital systems (IIR and FIR) and their utilities.	K3 (Apply)
CO2	Select design parameters of analog IIR digital filters (Butterworth and Chebyshev filters) and implement various methods such as impulse invariant transformation and bilinear transformation of conversion of analog to digital filters.	K3 (Apply)
CO3	Develop FIR filter using various types of window functions.	K3 (Apply)
CO4	Define the principle of discrete Fourier transform & its various properties and concept of circular and linear convolution. Also, students will be able to define and implement FFT i.e. a fast computation method of DFT.	K3 (Apply)
CO5	Identify the concept of decimation and interpolation. Also, implement it in various practical applications.	K3 (Apply)
